Dear Forest River Marine Dealers and Customers,

We are committed to communicating with all of our teammates, business partners, dealers, and customers. We seem to find ourselves in a very fluid environment at a global and community level. As we continue to enter into unprecedented times, we at Forest River Marine have decided to pause our core manufacturing activities. This pause will coincide with the state travel bans that we are abiding by that affect our teammates and vendor partners. Due to our physical manufacturing locations being located in Michigan and Indiana we find ourselves subject to the travel bans. Consequently, we have made the tough decision to shut down manufacturing from 3/24/2020 to 4/14/2020. This pause in manufacturing will let us do our part to contribute to the safety of our teammates and our local communities. We certainly apologize for the inconvenience that this has caused. We do have limited staff that is working daily to assist our customers. We still have the ability to ship some finished goods and parts. We are also diligently working on continuously improving the new website content and boat builder that we recently released. We will continue to monitor this ever-evolving situation, but our target to be back in production is on Tuesday the 14th of April barring any other catastrophic events. Please contact us via our website or email/call your sales manager for all inquiries. Thank you for your understanding in this difficult time. We certainly wish health and safety for all of our family and friends.

Warmest Regards,

Ryan Casey
